# 1. PHILOSOPHY

SHAH of Crypto is a Signals APP which built on Loyalty, Humbleness, Positivity & Sensation. We are highlighted in Crypto World with different gesticulations. Now with SHAH Token we are about to reflect all good gestures of our digital Community to our physical environment where everyone from us must be witnessing thankless, unappreciative & reward less behaviors everywhere. With SHAH token our aim is to achieve five major goals;

- Spread Positive Deeds, Ora and ampleness in our Society
- Increase Cooperation and Gratitude among Digital Communities & their members
- Spread Crypto Awareness & Learning opportunities without investing personal hard-earned money
- Starting use of Crypto in Daily Life's related small things

Contribute in Social Causes by joining hands of welfare organizations and putting our independent efforts

# 2.TOKENOMICS

Following is the list of tokenomics for the SHAH token. In total there will be only 100M SHAH tokens out of which 30M will be burnt manually over a short period of time. The circulation supply upon launch will only be 35M and the remaining tokens of 10M marketing, 10M future development, 10M Public Round, 5M Community & Airdrops will be locked prior to the launch in order to extend investor relation. These tokens will be unlocked when funds are needed for respective supply.

**Total Supply: 100,000,000**

**Burn: 30,000,000**

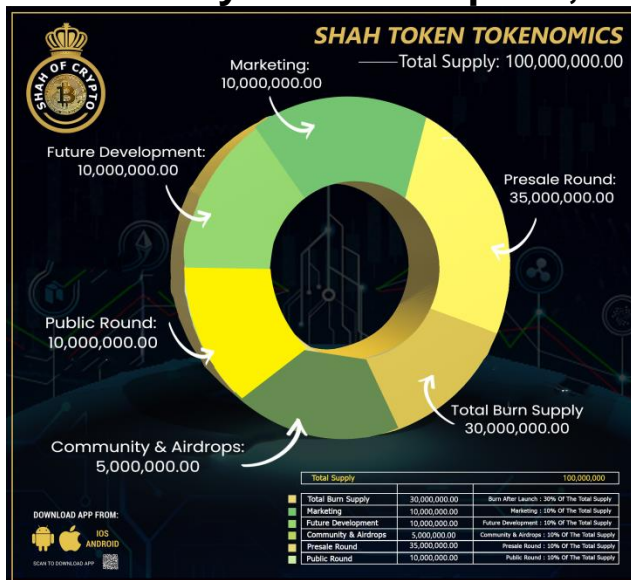

**Presale: 35,000,000**

**Marketing: 10,000,000**

**Future Developments: 10,000,000**

**Public Round: 10,000,000**

**Community and Airdrops: 5,000,000**

# 3. TAX SYSTEM

SHAH token preserves its own customized and feature rich smart contract which has provision to blacklist bots and scalpers. The smart contract is programmed with antiwhale and antidump mechanisms, in order to protect our investors.

The following is the amount of tax which will be collected on each transaction (Slippage).

## TAX FEES

1% - Burnt On Each Transaction

1% - Redistributed Amongst Holders As Passive Income

1% - Future Planning Wallet

**Slippage: 3%**

# 4. USE CASES

**SHAH TOKEN (SHAH)** is a utility token that will be used to incentivize the ecosystem of SHAH of Crypto APP and Shah Wallet. The main goal of the SHAH team is to make cryptocurrencies more accessible, useful and profitable for everyone throughout the world. By distributing SHAH Token, it will help spread awareness and gives everyone a chance to own their very first crypto token. It will also be used as a native wallet token of which the DAPPS will launch both on IOS and Android. SHAH Token will be used to access DEX (Decentralized Exchanges) such as Pancakeswap, Uniswap with security being the upmost priority.

Holders of SHAH tokens unlock a variety of benefits when using SHAH Wallet, including discounts on in-app cryptocurrency purchases and on the use of decentralized exchange (DEX) services. SHAH token holders can also participate in the governance of SHAH Wallet and can vote on SHAH Wallet update proposals, helping to shape the development of the wallet app.

SHAH token will be available in both Binance Chain and Binance Smart Chain, and will launch on Pancakeswap (DEX). Later on CoinMarketCap, CoinGecko, Kucoin, Okex, Bithumb, eToro and Binance.
